PROTOCOL

UNIFYING AND ANT-AGING TREATMENT

NORMAL TO OILY SKIN

1

➤ Clean the face with the **CLEANSING FOAM**.

2

➤ Then, Apply the **REGENERATING EYE CREAM** around the eyes generously.

3

➤ Apply **MATRIX LIFT SERUM** on the entire face and neck including the eyes area.

4

➤ Apply the **HYDRACTIVE DAY CREAM** over the entire face .

5

➤ In case of daily exposure to the sun, use the sun protection **DAY LONG 50+**, above or instead the **HYDRACTIVE DAY CREAM** over the entire face.

NIGHT ROUTINE | DAY 1 AND 2

FROM 10 TO 12 WEEKS

PHASE 2

Please be careful not to over-use the night treatment on areas exposed to shaving.

➤ Clean the face with the **CLEANSING FOAM**.

➤ Spread the **REGENERATING EYE CREAM** around the eyes generously.

➤ Gently swab the **ACTIVATOR CONCENTRATE SOLUTION** with a cotton pad on the face avoiding the outline of the eyes and mouth.

➤ Then apply the **ADVANCED ACTIVATOR NIGHT 2**, in a small amount on the face avoiding the outline of the eyes and mouth.

It is normal to have some local irritations especially at the beginning of the treatment such as redness and itching. In this case, you have to avoid and stop using the night treatment especially the **ACTIVATOR CONCENTRATE SOLUTION** on these areas for a few days by using the **HYDRACTIVE CREAM** until its complete healing.

PROTOCOL

UNIFYING AND ANT-AGING TREATMENT

NORMAL TO OILY SKIN

Please Note that the areas exposed to shaving specifically chin area and around the mouth are very sensitive and It reacts to the night treatment easily

Kindly pay attention to the characteristics of this area when applying the night routine by using a smaller quantity than the rest of the face.

It is also advised to isolate the corner of the mouth with lip ointments.

- > If you experience any dryness effect during the day, it's highly recommended to renew the application of the hydractive cream in order to sooth your skin during the treatment.

PROTOCOL

UNIFYING AND ANT-AGING TREATMENT

NORMAL TO OILY SKIN

➤ **The presence of the activator solution in your treatment regimen has some particularities in its application:**

- Focus well on the areas of impurities by swabbing it with a cotton pad but without exaggerating in quantities.
- Try to minimize the use on the sensitive areas like around the nose and mouth since it reacts quickly and significantly.
- It is normal to have some local irritations especially at the beginning of the treatment such as redness and itching. In this case, you have to avoid and stop using the night treatment especially the activator solution on these areas for a few days until its complete healing.
